Electronics Line 3000

Electronics Line 3000 is a world leading developer, manufacturer and provider of advanced security, safety, connectivity and control solutions, combined with remote management applications, for the residential and small commercial markets.

The Company was established in 1982, evolving throughout the years from a traditional manufacturer of security systems to an industry market leader, committed to developing advanced, next generation solutions. Technologies used in the Company's next-generation solutions provide value-added services such as: security monitoring, hazard detection, remote management of home and office appliances, advanced video capabilities, location based services and more. All these are provided using multiple advanced communications technologies including PSTN, GSM, Ethernet and GPRS.

The Company's solutions are suitable for mass market channels, such as service providers, monitoring companies, property developers and distributors, who are looking to rapidly expand their business into the lucrative area of residential security and control.

The Company operates through its global network of partners in Europe, U.S.A, Latin America and APAC, with over three million control systems and 20 million devices installed worldwide. The Company's state-of-the-art fully automated manufacturing facilities ensure mass production of high quality products.

With nearly 30 years of proven experience and a list of hundreds of satisfied partners, Electronics Line 3000 is world renowned as a competent and trustworthy business partner, committed to offering customized solutions and market expertise, as well as sales, installation and technical support, enabling our partners to successfully launch and operate value-added services, making this product offering a reality.

Electronics Line 3000 is headquartered in Israel, with additional offices worldwide, and is publicly traded on the Frankfurt Stock exchange market (XETRA: ELN).

Everything is under control

commpact
Connected. Protected.

CommPact, Electronics Line 3000's innovative solution offers comprehensive wireless security and connectivity, within a compact design and at an attractive market price, for the residential and small commercial markets. This all in one box solution includes all essential functionalities, with the added bonus of extra small packaging, simple wireless installation and advanced remote management capabilities. All these make CommPact an ideal value for money solution which allows users to enjoy a complete sense of control and peace of mind.

CommPact includes advanced interactive remote management applications for end users and providers, which can be offered according to specified needs. Providers may supply the basic CommPact solution configuration with PSTN or GSM functionalities only, or may choose to offer the solution's enhanced GPRS-based remote management applications using the proprietary Electronics Line Application Server (ELAS). Providers looking for a cost-effective option may choose an alternative of utilizing CommPact's low cost proxy-based management features.

Quick Installation and High Reliability

CommPact offers uncompromised reliability, low false alarm rates and advanced functionality. The solution is quick and easy to install and offers users intuitive operations as well as easy upgrades and monitoring for providers. Providers utilizing the ELAS also benefit from unique programming and management applications enabling remote system set-up, diagnostics, maintenance and updates as well as remote firmware upgrades.

Advanced Security, Safety and Connectivity

Security detectors, ranging from motion to curtain detectors, vibration sensors, glassbreak detectors and magnetic switches for windows and doors, offer enhanced interior and perimeter protection. Innovative technologies incorporating advanced RF and signal processing as well as pet-immunity features offer complete security and ensure high reliability.
A range of dual-technology detectors also provide excellent detection based on combined PIR and microwave detection, virtually eliminating false alarms.

Safety detectors offer enhanced environmental and personal safety including: smoke, gas and water leak detection, panic buttons and more. Additionally, built-in microphone and speakerphone for two-way conversation enable communicating outside the home.

Interactive Remote Management

Advanced remote management features offer comprehensive system control for users via landline phone, cellular and PC/laptop. Users receive real-time SMS and email alerts in cases of events and can also send commands for arming and disarming the system as well as conduct remote status checks.

CommPact in GPRS mode also includes dedicated Web and WAP user interfaces, enabled through Electronics Lines 3000's proprietary application server, providing interactive online system management. Functionalities include activating the system, defining user codes and alerts settings, utilizing video look-in as well as accessing event logs.

Users also enjoy the benefits of integrated Location Based Services. A dedicated locator device allows users to always be up to date of where loved ones carrying the device are and receive real-time alerts in cases of distress. Users can access online maps through the Web User Interface and view the current location of the person carrying the locator device, define safe zones and more.

Unique Marketing Platform for Providers

CommPact in GPRS mode provides a unique marketing platform for providers, who can use the solution to increase presence at customers' daily life. All system components, Web and WAP user interfaces, emails and SMS notifications may be privately labeled with the provider's brand and used as an advertising platform to communicate ongoing marketing messages.

Being Far, Feeling Close

Web User Interface

A dedicated Web interface provides interactive on line system management:

>> Remote system activation
>> Defining system settings
>> Event logs management
>> Location based services
>> Video look-in

WAP User Interface

Comprehensive remote management via mobile phones, for convenient system control including:

>> Remote system activation
>> Managing users and codes
>> Defining alert settings
>> Event logs management

Integrated Personal Location Based Services

For enhanced peace of mind users can track movements of family members, access online maps and view the current location of the person carrying the locator device, define safe zones, location parameters, and settings. Locator features:

>> Panic button for emergency calls
>> SMS and email alerts to pre-defined destinations
>> Two-way voice channel to different pre-set numbers
>> Dialing options to additional pre-registered numbers

Remote Programmer: Local and Web

Offers quick and easy system setup; high-speed local programming via Windows, or remote programming via GPRS, GSM and PSTN networks.

>> Enables mass distribution of system parameters
>> Enables adding keyfobs and deleting peripherals
>> Provides a secure customer database with passcode protected libraries
>> Cuts down the installation time on-site

Remote Firmware Management Program (RFM)

A unique tool which enables easy mass remote updates of new firmware versions for CommPact GPRS control systems. Enables streamlined operations for minimal service calls and visits.

EL-2607 Vibration Detector

Detects low amplitude vibrations around vulnerable access points for early detection of break-in attempts.

EL-2626AC Outdoor Siren and Strobe

Supervised two-way wireless siren and strobe, 105dB, AC powered with battery back-up. Red/amber/blue flash lens.

EL-2652SR External PI Detector

5m external short range dual PIR detector, with pet immunity of up to 10kg/22lb.

EL-2752 Outdoor PI Detector

Offers advanced external protection, employing size judging functionality and dual PIR detection to discriminate between large and small animals and prevent false alarms.

GPRS

GSM

PSTN

EL-2714 Wireless Multifunction Keyfob

Full/Part/Perimeter Arm and Disarm, and SOS.

EL-2611 Medical Emergency Button

Water resistant, wireless panic button with pendant/keychain option.

EL-2620 Wireless Keypad

Wireless numeric keypad for complete system control. One-touch Full/Part/Perimeter arm, panic alarm function with built-in buzzer and tamper switch. 9V alkaline battery powered.

EL-2621 Two-Way Wireless Keypad

Two-way wireless numeric keypad for complete system control with system status indication. One-touch Full/part/Perimeter arm, panic alarm function with built-in buzzer and tamper switch. 12VDC powered.

The product range and features as described above may vary from time to time at the Company's discretion.

Connected. Protected.

EL-2645/ PI/ EL-2745/PI Motion Detectors

Low current Microprocessor signal analysis for reduced false alarms, with adaptive pulse and temperature compensation. Optional 45kg/100lb pet immunity. EL-2745 includes a mounting bracket and an accessible battery compartment.

EL-2650XL Directional Curtain Detector

Quad element PIR directional curtain detector for perimeter protection. Narrow beam curtain allows free movement within protected premises.

EL-2606 Glassbreak Detector

Detects the acoustic frequency of breaking glass.

EL-2601 Magnetic Switch

Door and window intruder detection.

EL-2602 Universal Transmitter

Suitable for connecting a variety of peripherals to the control system.

EL-2603/EL-2603EN Smoke Detectors

Photoelectric smoke detector and EN-54-7 approved photoelectric smoke detector.

EL-2664 Carbon Monoxide Detector

Detects and warns of carbon monoxide presence.

EL-2661 Water Leak Detector

Provides early warning of water leaks.

EL-2662 Gas Detector

Detects leaks of heating or cooking gas.

EL-2663 Low Temperature Detector

Low temperature detection (under 5°C) for pipe burst prevention.

EL-2635 Wireless Repeater

Extends the range between the control system and wireless detectors.
